

Genetix[®] Process Controller Systems

The capabilities and flexibility of the Genetix Controls Components allows the customer to easily integrate Genetix into their control system. Genetix can handle the control tasks from a single Belt Scale installation to a complex blending operation with multiple Weigh Feeders and PLC controls.

Genetix Flexible system Configurations *One-To-Many or One-to-One*

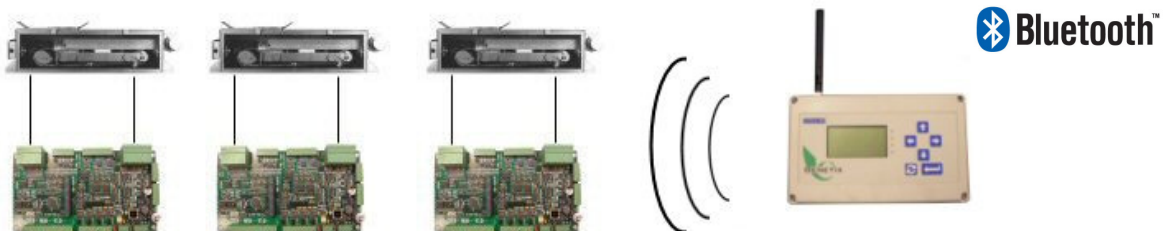

A single Color Touch Screen Display can access and operate multiple Genetic Core Modules (GCMs) and feeders saving valuable cabinet and mounting space.

Multiple Genetix GCMs (Feeder mounted) connected to remote Color Display

Using a Bluetooth[®] Wireless Interface, a single battery-powered Portable Display can access and operate multiple Genetic Core Modules (GCMs) and feeders. This simplifies set-up and calibration of the scales or feeders

Battery-powered Wireless Display for Multiple Genetix GCMs (Feeder mounted)
